- Adaptability

PROFESSIONAL PROFILE

Software Analysis and Development Technologist graduated from SENA, with over 3 years of experience developing projects autonomously and practical experience in the SENA Software Factory. Certified B1 English, with the ability to read technical documentation and collaborate in international environments.

Passionate about Full Stack development, modern interfaces, scalable systems, and automation. Experience building complete web applications with frontend and backend technologies, integrating databases, REST APIs, JWT authentication, and modern architectures. Oriented towards continuous learning, innovation, and building projects with real impact.

EXPERIENCE

Full Stack Developer — Independent Projects

2022 – Present

Independent experience · +3 years

- Development of complete web applications with React, TypeScript, TailwindCSS on the frontend.
- Building REST APIs with Spring Boot, Node.js, and JWT authentication.
- Integration with PostgreSQL and MySQL databases; relational schema design.
- Automation of workflows, external API consumption, and AI model integration.
- Version control with Git/GitHub and deployment with Docker and Linux environments.

Developer — SENA Software Factory

SENA

Servicio Nacional de Aprendizaje · Institutional Practice

- Participation in real projects within the Software Factory development ecosystem.
- Application of requirement analysis methodologies and technical documentation.
- Collaborative teamwork using software development standards.

EDUCATION

Software Analysis and Development Technologist

Graduated

Servicio Nacional de Aprendizaje — SENA

- Development of modern and responsive web applications.
- Object-oriented programming and software architecture.
- Design and administration of relational databases.
- Building and integration of REST APIs.
- Requirement analysis and technical documentation.

- Analytical Thinking

FEATURED PROJECTS

ROOM 911 Management System
Administrative access control system with biometric authentication, JWT, dashboards, reports, and employee management.

AlgoTrainer
Interactive training platform for speedcubers focused on algorithm recognition and execution.

HuertaDirecta
Web platform connecting Colombian farmers directly with buyers in a simple and accessible way.

Ainglo
Intelligent AI assistant for learning English with Telegram, voice recognition, TTS, and a smart dictionary.
